

Special Issue

Land Use Policy and Food Security: 2nd Edition

Message from the Guest Editors

Food security is the foundation of the stable development of human society and economy, and the land use policy of a country is closely related to food security. However, we still lack systematic research and understanding on how these useful land use policies systematically affect market development, how to reshape farmers' land use patterns, how to change farmers' planting structure, and how to ensure farmers' food security and sustainable development. Based on this background, this Special Issue is dedicated to building a theoretical and practical research platform for studies systematically assessing the direct and indirect impacts of land use policies on food security and sustainable development. Topics of interest include, but are not limited to, the following:

- Evolution of logic and enlightenment of land use policy;
- Land use policy and market development;
- Land use policy and food security;
- Land use policy and sustainable development.

About the Journal

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

Editor-in-Chief

Prof. Dr. Christine Fürst

Institute for Geosciences and Geography, Department Sustainable Landscape Development, University of Halle, Von-Seckendorff-Platz 4, 06120 Halle, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
