Special Issue

Rural-Urban Interaction in Terms of the Spatial Pattern and Local Development

Message from the Guest Editors

Enhancing rural-urban interactions has been gradually recognised as an overarching strategy to guide spatial interventions towards more sustainable and inclusive development, as well as the fundamental path to achieve rural revitalization, by improving urban-rural synergies, including optimising the management of ecosystems and natural resources, conceiving and implementing long-term plans that promote both the inclusivity for local actors that aim to reduce social. economic, and territorial gaps, as well as the free flow and equal exchange of urban-rural factors. During the process of rapid urbanization and industrialization, new changes have taken place in the divisions of industries and functions between urban and rural areas. Meanwhile, the development of technology and multidimensional local and global networks enable the spatial flows of developing factors and population mobilities in a much wider range and higher speed. This has also led to the spatial pattern of rural-urban interactions constantly changing, which promote local development transformation.

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend Land for your best research publications for a fast dissemination of your research.

Editor-in-Chief

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
