

Special Issue

Urban Landscape Transformation vs. Heritage and Memory

Message from the Guest Editors

Following the success of the Special Issue “Urban Landscape Transformation vs. Heritage”, we are pleased to announce the launch of a second volume. As cities today face the consequences of rapid population growth and uncontrolled urbanisation, as well as the impact of environmental changes and disaster, there is growing pressure in terms of land resources and the limited usable land available in urban areas. Within this rapidly shifting, everchanging, and globally evolving urban context, rethinking the role of heritage and memory as an integral part of urban landscapes and land usage requires new attention, definitions, and comparisons. The goal of this Special Issue is to collect papers to address the following questions:

- How can urban landscape transformation contribute to the protection of heritage and influence the perception of memory?
- Does urban landscape transformation, in fact, transform heritage and memory?
- Can urban landscape transformation achieve an awareness of memory and generate new heritage?

We look forward to receiving your original research articles and reviews.

Guest Editors

Prof. Dr. Bojana Bojanic Obad Scitaroci
Dr. Nerma Omićević
Dr. Tamara Zaninović

Deadline for manuscript submissions

5 September 2026

About the Journal

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant Impact Factor, and has a goal to become the best journal in land in the coming years.

Editor-in-Chief

Prof. Dr. Christine Fürst
Department Sustainable Landscape Development, Institute for
Geosciences and Geography, University of Halle, Halle, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), GEOBASE, PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
