

Special Issue

Mega-City Regions in the Global South

Message from the Guest Editors

This Special Issue focuses on the complexities of mega-city regions in the Global South. It aims to bring professional practices and academic discussion into conversation with one another, help to address key issues in these places, and advance the theoretical understandings of mega-city regions. We welcome theoretical reflections from different perspectives, methodological explorations from different disciplines, and empirical studies (both qualitative, such as case studies, and quantitative, such as modeling) from different geographic areas in the Global South. The key topics include, but are not limited to, the following:

- Global cities in the Global South;
- Social and spatial dynamics in large cities, mega cities, and mega-city regions;
- Demographic, land, and industrial development in mega-city regions;
- Spatial planning and governance in large cities and megaregions;
- Urban-rural interaction in regional development;
- Mega-city regions in the national and/or global economy;
- Post-colonial and critical urban theory;
- Comparative urban studies.

Guest Editors

Prof. Dr. Guangzhong Cao

Dr. Qiuji Shi

Dr. Tao Liu

About the Journal

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

Editor-in-Chief

Prof. Dr. Christine Fürst

Institute for Geosciences and Geography, Department Sustainable Landscape Development, University of Halle, Von-Seckendorff-Platz 4, 06120 Halle, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
