

## Special Issue

# The Utilization of National Parks' Natural Resources and Community Livelihood

### Message from the Guest Editor

The aim of this Special Issue is to collect papers (original research papers and review papers) that will provide an important tool for assessing the coupled systematic regulation and adaptation of natural resource use, natural-based tourism, and community development in national park areas. By understanding the relationship between people and nature in national park areas, decision makers can optimize their policies and work toward a more sustainable future. **This Special Issue welcomes the submission of manuscripts that link the following themes:**

- natural resource utilization and management in national park areas;
- impacts of climate change on natural landscape and adaptation;
- natural landscape value of national parks;
- nature-based tourism development and management in national parks;
- landscape dynamics and community development;
- transforming community livelihoods in national parks.

We look forward to receiving your original research articles and reviews.

## About the Journal

### Message from the Editor-in-Chief

*Land* is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.
