

Special Issue

Exploring Urban Landscape Sustainability

Message from the Guest Editors

Landscape sustainability is defined as the capacity of a landscape to consistently provide long-term, landscape-specific ecosystem services essential for maintaining and improving human well-being. Cities are the primary environments for human activity, with more than half of the world's population living in urban areas. However, the urban landscape faces a unique set of challenges in achieving sustainability, including rapid population growth, urbanization, climate change, and resource depletion. Therefore, understanding how to achieve urban landscape sustainability is essential for ensuring the long-term well-being of urban communities, which requires a multifaceted and collaborative approach that involves various stakeholders, including policymakers, urban planners, residents, and businesses. This Special Issue will welcome manuscripts that link the following themes:

- Landscape sustainability;
- Landscape design;
- Urban ecosystem services;
- Human well-being;
- Ecosystem service flow;
- Ecosystem service risk;
- Sustainability assessment.

About the Journal

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

Editor-in-Chief

Prof. Dr. Christine Fürst

Institute for Geosciences and Geography, Department Sustainable Landscape Development, University of Halle, Von-Seckendorff-Platz 4, 06120 Halle, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
