

Special Issue

Social, Ecological, and Landscape Resilience in the Face of Climate Change

Message from the Guest Editor

This Special Issue will compile compelling research papers that focus on climate-change-induced changes in land, biodiversity, and humans and their livelihoods and their impact on mountains and downstream areas.

- Livelihood vulnerability assessment;
- Land use and land cover change;
- Human wildlife conflicts and the role of climate change;
- Climate-related disasters and its impact on food, water, energy, and ecosystems;
- Social perception of climate change and effective local adaptations;
- Appropriate technology for improving adaptation to climate change and disasters.

Keywords:

- climate change
- 3rd pole
- mountains
- vulnerability to climate and disasters
- land use
- water, food, energy nexus

Guest Editor

Prof. Dr. Sonam Wangyel Wang

About the Journal

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant Impact Factor, and has a goal to become the best journal in land in the coming years.

Editor-in-Chief

Prof. Dr. Christine Fürst
Department Sustainable Landscape Development, Institute for
Geosciences and Geography, University of Halle, Halle, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), GEOBASE, PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
