Redefining Urban Landscapes: Land Use and Regional Development in the Era of Urbanization

Message from the Guest Editors

Urban landscapes, primarily measured by urban land use, keep changing with global urbanization, attracting continuous attention. Given that the varying stages, dynamics, and patterns of urbanization create diverse urban landscapes, it is essential to incorporate urban land use change studies with urbanization contexts and to summarize the evolution laws. We call for theoretical explorations and understanding of urban land use change embedded in urbanization contexts.

Furthermore, with the ongoing process of city regionalization, urban landscape research requires expansion to the regional scale. There is also a critical need to further explore the relationship between urban land use change and regional development, particularly in metropolitan areas and megalopolises. We call for richer and more diversified empirical studies. This Special Issue focuses on changing urban landscapes during the urbanization process. We welcome interdisciplinary dialogues, drawing on different theories, methodologies, and case studies.

About the Journal

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

Editor-in-Chief

Prof. Dr. Christine Fürst

Department Sustainable Landscape Development, Institute for
Geosciences and Geography, University of Halle, Halle, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
