

## Special Issue

# Land Governance and Local Tenure Systems: The Role of Government Policy

### Message from the Guest Editors

The United Nations 2030 Agenda for Sustainable Development (2030 Agenda) addresses the economic, social and environmental dimensions of sustainable development in an integrated and balanced manner by focusing development efforts around the 17 “integrated and indivisible” global Sustainable Development Goals (SDGs). Land administration has a major influence on the fulfillment of these goals. In this Special Issue, we expect the publication of research results that will provide answers to questions such as:

- How can we improve local tenure systems?
- How can we make land administration in countries where land administration does not exist?
- How can we implement the digital transformation of land administration data where it is needed?
- How can land administration be upgraded in 3D to be more efficient?
- How can the Agenda for Sustainable Development be followed until 2030 for good and efficient land governance and local tenure systems?

---

### Guest Editors

Dr. Nikola Vučić

State Geodetic Administration, Gruška 20, 10000 Zagreb, Croatia

Dr. Hrvoje Tomić

Faculty of Geodesy, University of Zagreb, Zagreb, Croatia

Dr. Saša Vranić

Geoweb (Freelance Consultant), 44000 Sisak, Croatia

## About the Journal

### Message from the Editor-in-Chief

*Land* is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.
