Special Issue

Advancing Sustainability through Land-Related Approaches: Theoretical Foundations and Empirical Investigations

Message from the Guest Editors

Land plays a crucial role in shaping sustainable development and addressing pressing global challenges. A wide range of land-related disciplines and research areas. We invite submissions that explicitly link land to sustainability through either empirical research or conceptual/theoretical works, including but not limited to:

Land-use change and its environmental and socioeconomic implications; Spatial analysis and modeling for land-based sustainability assessment; Land tenure systems and their impact on sustainability; Sustainable land governance and policy frameworks; Land-use planning and management for sustainability; Geodesign and land system architecture for sustainability; Land degradation and restoration strategies; Urban spatial governance and sustainable cities; Indigenous land rights and sustainable practices; Land-based climate change mitigation and adaptation measures.

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend Land for your best research publications for a fast dissemination of your research.
