

Special Issue

Rural Social Movements and the Question of the Land in the 21st Century

Message from the Guest Editor

The goal of this Special Issue is to collect papers (original research articles and review papers) to give insights about the diverse strategies employed by rural social movements in addressing the multifaceted challenges posed by the 21st century's complex nexus of threats and crises. We seek to understand how these movements are redefining "re-peasantization" as a comprehensive response to climate change, land dispossession, and the commodification of food, advocating for a sustainable and equitable future that centers on agroecology, food sovereignty, agrarian reform and the defense of land and territory, and territorial autonomy.

This Special Issue will welcome manuscripts that link the following and related themes:

- Land grabbing and the defense of land and territory;
- Agroecology and food sovereignty;
- Territorial autonomy;
- Peasants and indigenous people;
- Rural social movements.

We look forward to receiving your original research articles and reviews.

About the Journal

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

Editor-in-Chief
