Special Issue

Resilient Land Use and Sustainable Regional Development: Insights from SD2025

Message from the Guest Editors

Considering the dynamics of global challenges—ranging from climate change to rapid urbanization and socioeconomic disparities—sustainable land use and territorial governance have emerged as critical pillars for fostering resilient and inclusive regional development. This Special Issue, motivated by the **VII International Congress on Sustainable Development** (SD2025) held in Cape Town, South Africa, aims to bring together cutting-edge research and innovative practices addressing the complexities of land management, environmental sustainability, and regional planning, particularly in peripheral and cross-border regions.

- Sustainable land use planning and management;
- Territorial governance and regional strategies;
- Ecosystem services and biodiversity conservation;
- Circular economy and land resource efficiency;
- Climate change adaptation in land use practices;
- Smart cities, smart regions, and sustainable infrastructure;
- Sustainable tourism and cultural landscape management;
- Public policies for environmental management and resilience;
- Connectivity, accessibility, and sustainable transport systems in regional development.

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend Land for your best research publications for a fast dissemination of your research.
