## **Special Issue**

# New Technologies and Methods in Spatial Planning

## Message from the Guest Editors

This Special Issue aims to bring together new technologies, approaches, and even paradigms of spatial planning in the context of the early 21st century. For this Special Issue, we invite papers related to, but not limited to, the following topics:

- New data, technologies, and methods (ICTs, Al, IoT, UAV) for spatial planning;
- New trends of spatial planning across various contexts;
- Case studies of new spatial planning for various scales;
- Governance of spatial planning;
- Comparative studies of spatial planning across different countries:
- The effects of various types of urban spatial planning.

## Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend Land for your best research publications for a fast dissemination of your research.
