

Special Issue

Efficient Land Use and Sustainable Development in European Countries

Message from the Guest Editors

Land use, land resource demands, and landscape management practices are linked to many of contemporary society's environmental, climatic, and socio-economic challenges. Measuring land use efficiency is pivotal for guiding land use management decisions and promoting more effective and efficient land utilization strategies. The goal of this Special Issue is to collect papers (original research articles and review papers) to provide new knowledge of the European scope and give insights about linking land use efficiency with sustainable development. We welcome empirical research or conceptual/theoretical works examining key processes that include, but are not limited to, the following:

- Institutional frameworks and policy review;
- Land use management and territorial governance;
- Linking land use and value creation;
- Implementing ecosystem services in land management;
- Land use efficiency and value capture;
- Value-led development planning and value capture instruments;
- Land system science and sustainable development;
- Sustainability science for policy-making.

Guest Editors

Prof. Dr. Armands Auziņš

Dr. Andreas Hendricks

Dr. Francesco Botticini

Prof. Dr. Vida Maliene

About the Journal

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

Editor-in-Chief

Prof. Dr. Christine Fürst

Institute for Geosciences and Geography, Department Sustainable Landscape Development, University of Halle, Von-Seckendorff-Platz 4, 06120 Halle, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
