

## Special Issue

# Restoration of Tropical Peatlands: Science Policy and Practice

### Message from the Guest Editors

The goal of this Special Issue is to present original research articles and review papers that provide insights into the science, policy, and practices associated with tropical peatland restoration in Indonesia. Specifically, the Issue aims to highlight the best practices and evidence from the literature on how degraded peatland can be restored to enhance soil fertility; improve production, income, and biodiversity on farms; and support the mitigation of, and adaptation to, the climate crisis and achievement of the Sustainable Development Goals. This Special Issue welcomes the submission of manuscripts that link the following themes. Restoration of degraded peatland; Sustainable management of peatland; Ecosystem goods and services from peatland; Paludicultural practices.

## About the Journal

### Message from the Editor-in-Chief

*Land* is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.
