

Special Issue

Observation, Monitoring and Analysis of Savannah Ecosystems

Message from the Guest Editors

Savannahs are spatially complex environments, involving widely varying arrangements of woody and grassy cover, and they are influenced in particular by climate, fire regimes, herbivory, and human disturbance. The effective safeguarding and appropriate exploitation of savannahs rely on the accurate knowledge of savannah distributions and dynamics, as well as a clear understanding of savannah processes and drivers. This Special Issue presents the latest research on observing, monitoring, and analyzing savannah ecosystems. Papers are welcome to cover any aspect of savannah research, with example topics including:

- Observation using field-based and/or remote sensing approaches;
- Mapping, monitoring, and prediction of savannah distributions;
- Ecosystem processes;
- Land degradation;
- Bush encroachment;
- Drivers of change;
- Relationship between human activity and natural environment;
- Ecosystem services such as carbon uptake, biodiversity, and tourism.

Guest Editors

Prof. Dr. Paul Aplin

Dr. Elias Symeonakis

Prof. Dr. Moses Azong Cho

Deadline for manuscript submissions

About the Journal

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

Editor-in-Chief

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
