

Special Issue

Allocation of Land Resources in the Evolution Process of Human–Land Relationship and Urban–Rural Relationships

Message from the Guest Editors

Land is the spatial carrier of urban–rural regional systems. The theory of regional systems of human–land relationships is the theoretical cornerstone for understanding the development of social, economic and ecological environments in urban and rural areas. Therefore, it is necessary to promote the optimal allocation of land resources. Research on human–land, urban–rural, and regional development relationships, as well as the land–population–industry–environment coordinated development relationship, will be conducive to promoting harmonious human–land relationships and the sustainable development of urban and rural areas. In this Special Issue, we invite conceptual, empirical, review, or exploratory papers on, but not limited to, the following topics:

- Allocation of land resources and human–land relationships;
- Allocation of land resources and urban–rural relationships;
- Geospatial intelligence and remote sensing technology in land use;
- Coordinated development relationship of “land–population–industry–environment”.

About the Journal

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant Impact Factor, and has a goal to become the best journal in land in the coming years.

Editor-in-Chief

Prof. Dr. Christine Fürst
Department Sustainable Landscape Development, Institute for
Geosciences and Geography, University of Halle, Halle, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), GEOBASE, PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
