

Special Issue

Climate Adaptation Planning in Urban Areas (Second Edition)

Message from the Guest Editors

Climate adaptation is crucial for urban areas as it ensures the resilience and sustainability of cities in the face of increasing climate-related challenges, such as extreme weather events, rising sea levels, and shifting temperature patterns. By proactively addressing these risks, urban areas can protect their infrastructure, safeguard public health, and maintain economic stability, securing a livable and thriving environment for current and future generations. This Special Issue of “Climate Adaptation Planning in Urban Areas (Second Edition)” aims to collect papers to give insights about innovative strategies, policies, and practices that cities can adopt to enhance their resilience and adaptability in the face of climate-related impacts.

About the Journal

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant Impact Factor, and has a goal to become the best journal in land in the coming years.

Editor-in-Chief

Prof. Dr. Christine Fürst
Department Sustainable Landscape Development, Institute for
Geosciences and Geography, University of Halle, Halle, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), GEOBASE, PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
