

Special Issue

Rural Tourism Development: Land Use, Ecosystem Services, and Community Interactions

Message from the Guest Editors

We are pleased to invite you to submit your work to this Special Issue. Rural tourism represents a niche field promoting local sustainability and sustainable economic and cultural development in local areas, aiming to ensure cultural capitalization and heritage preservation in line with the care of all environmental features of places and regions. This Special Issue seeks to empower impactful research by revealing the potential of rural tourism to adopt land use ecosystem services and community interactions that facilitate a transition to sustainable rural environmental systems. Since research on issues surrounding rural tourism that are connected to ecosystem services and community interactions remains largely overlooked, submissions to this Special Issue should cover the intersection of all aspects of the sustainable development of rural areas through tourism, land use, and community interactions. Submissions are in the form of original research articles, opinions, and reviews. We look forward to receiving your submissions.

About the Journal

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant Impact Factor, and has a goal to become the best journal in land in the coming years.

Editor-in-Chief
