

Special Issue

Food Supply Chain and Land Management between Climate Neutrality and Circular Economy Goals: New Challenges for Social and Environmental Transition

Message from the Guest Editor

The current and emerging challenges facing the planet, such as the COVID-19 pandemic and climate change, underline the need to build a more resilient, sustainable, and inclusive society. Various communities are working to ensure a healthy, safe, and innovative future for young people and future generations. To this end, several challenges have emerged. In this context, the role of the agri-food chain and the related land management are crucial. Indeed, the transition towards climate neutrality and the circular economy presents challenges related to the definition of new business and agricultural production models, institutional sustainability measures, the introduction of innovative technologies and the sharing of know-how, and a change of approach in consumption and waste management. This special issue intends to welcome contributions that analyze approaches to climate neutrality and the circular economy and/or show solutions that can improve operations and processes, reconsider environmental and social criteria, and redesign products, services, and decision-making processes, with a view to better land management.

About the Journal

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant Impact Factor, and has a goal to become the best journal in land in the coming years.

Editor-in-Chief

Prof. Dr. Christine Fürst
Department Sustainable Landscape Development, Institute for
Geosciences and Geography, University of Halle, Halle, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), GEOBASE, PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
