

Special Issue

Urban Micro-Segregation

Message from the Guest Editors

This Special Issue aims at bringing evidence on micro-segregation forms from diverse metropolitan contexts across the planet. Interpretations of the ways urban micro-segregation is shaped by global and local forces are also part of the scope of this SI and should pave the way to assess its impact on sociospatial reproduction. Mapping micro-segregation in different cities is also an essential element of capturing and exploring the provided evidence and brings this SI close to the scope of *Land* (mainly to the section: Urban Contexts and Urban–Rural Interactions). In this Special Issue, we invite papers focusing on, but not limited to, the following topics:

- Forms of racial, ethnic and/or social micro-segregation
- Trends of change in micro-segregation forms in metropolitan areas
- Comparative studies of micro-segregation in different urban contexts
- Mapping micro-segregation forms
- Interpretation of the development and reproduction of micro-segregation forms
- Exploration of the micro-segregation effect.

Authors should submit abstracts (300 words) to Land@mdpi.com by 30 November 2022. Full manuscripts should be submitted before 30 June 2023.

Guest Editors

Prof. Dr. Thomas Maloutas

Dr. Sainan Lin

Prof. Dr. John Logan

About the Journal

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

Editor-in-Chief
