

Special Issue

Land Space Optimization and Governance

Message from the Guest Editors

The goal of this Special Issue is to gather together papers (original research articles and review papers) that provide insights into land space optimization and governance. It aligns with the journal's scope by emphasizing the application of cutting-edge technologies and interdisciplinary approaches to address pressing land space challenges. We welcome manuscripts that link the following themes:

- Novel theories in land space optimization and governance;
- Land space optimization and geospatial technologies;
- Land space optimization, artificial intelligence, machine learning, and big data;
- Challenges and innovations in land space governance methods;
- Land space optimization for sustainable development;
- Land space optimization for high-quality economic and social development;
- Land planning and urban–rural integration;
- Comprehensive land consolidation and land space governance;
- Global case studies on land space governance;
- Legal and policy innovation in land space governance;
- The cross-regional coordination of land space governance.

We look forward to receiving your original research articles and reviews.

About the Journal

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

Editor-in-Chief

Prof. Dr. Christine Fürst

Institute for Geosciences and Geography, Department Sustainable Landscape Development, University of Halle, Von-Seckendorff-Platz 4, 06120 Halle, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
