

Special Issue

Feature Papers for the ‘Land Socio-Economic and Political Issues’ Section: Achieving the Sustainable Development Goals—2nd Edition

Message from the Guest Editor

Land use is shaped by a complex nexus of socio-economic and political factors which significantly influence Sustainable Development Goals (SDGs). Economic forces such as market demand, urbanization, and resource extraction play key roles in shaping land use patterns, often leading to adverse environmental and societal impacts. By integrating diverse perspectives and expertise, policymakers can develop strategies that prioritize environmental conservation, social equity, and economic development, ensuring the long-term health and resilience of our land and communities. We invite submissions from a diversity of disciplinary backgrounds including environmental science, economics, political economy, socio-economic, development economics, sociology, and political science. We particularly seek submissions that demonstrate a high degree of methodological rigor in their examination and analysis of land issues, and that contribute to innovative approaches for achieving the SDGs. We welcome interdisciplinary work that synthesizes multiple perspectives, methods, and data sources to provide novel insights into land issues and their relation to the SDGs.

Guest Editor

Prof. Dr. Hossein Azadi

Department of Economics and Rural Development, Gembloux Agro-Bio Tech, University of Liège, 5030 Gembloux, Belgium

Deadline for manuscript submissions

31 December 2025

About the Journal

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

Editor-in-Chief

Prof. Dr. Christine Fürst

Institute for Geosciences and Geography, Department Sustainable Landscape Development, University of Halle, Von-Seckendorff-Platz 4, 06120 Halle, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
