Post-Disaster Urban Futures: Disruptive Planning, Design and Resilience in Climate Crisis and Conflict

Message from the Guest Editors

Climate change is altering the frequency and intensity of potentially risk-generating meteorological phenomena. However, land use models, particularly urbanization models, often rely solely on historical data about these events' past periodicity and intensity. The increased severity and potential new combinations of hazards create significant uncertainty, exposing regions to unprecedented and unpredictable events. This is compounded by a geopolitical reality where wars continue to devastate territories and cities. In this world of crises, conflicts, and climate change—marked by unprecedented challenges—the only constant is uncertainty. While we cannot predict the future precisely, we can still envision it through scenarios, and this uncertainty does not invalidate the role of urban and territorial planning and design.

This Special Issue focuses on urban and territorial processes altered by catastrophes, crises and conflicts, while suggesting new planning and design frameworks that incorporate uncertainty into their conceptualization.

Guest Editors

Dr. Inés Aquilué Junyent

Dr. Javier Ruiz Sanchez

Dr. Roger Joan Sauquet Llonch

Dr. Alvaro Ardura Urquiaga

Prof. Dr. Ho Gul Kim

Deadline for manuscript submissions

29 April 2026

About the Journal

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

Editor-in-Chief

Prof. Dr. Christine Fürst

Department Sustainable Landscape Development, Institute for
Geosciences and Geography, University of Halle, Halle, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
