Special Issue

Managing Urban Green Infrastructure and Ecosystem Services

Message from the Guest Editors

For this Special Issue, we are interested in contributions that link urban green infrastructure and/or ecosystem services and land management strategies with information-based decision making, good practices and different decision-making models at different levels. The focus of the papers submitted to this Special Issue may relate to-but are not limited to-the following themes: ISO LADM: Land Administration Domain Model extensions concerning urban green Infrastructure and/or SE-exploring the integration and harmonizing with the principles of ISO LADM, Urban Pre-parcellation (Consolidation) Strategies: investigating urban preparcellation techniques and strategies that enhance the implementation of urban green infrastructure. Landscape Aspects in Urban Green Infrastructure: valuing economic, social and environmental aspects. Assessments and Technical Aspects of Urban Green Infrastructure: exploring methodologies for valuing land and property within the context of urban green infrastructure.

About the Journal

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend Land for your best research publications for a fast dissemination of your research.

Editor-in-Chief

Prof. Dr. Christine Fürst
