

Special Issue

Urban Resilience and Heritage Management

Message from the Guest Editors

The goal of this Special Issue is to collect papers (original research articles and review papers) to provide insights about the capacities of heritage to increase the resilience of our cities, territories, and landscapes, representing a wide field of possibilities, in particular, the search for balances between small and medium cities, with respect to large metropolitan areas. It is worth noting the patrimonial plurality of identity factors and cultural assets of a very varied type and entity. This richness can become an essential component to reduce the impact of and overcome land-related risks and threats that are complex to manage. Thus, those derived from climate change, depopulation in rural areas, or tourist pressure, among other issues, should be highlighted, particularly in historic centres and coastal areas. They affect especially significant assets that can become qualified actors in more resilient cities, territories, and landscapes.

Guest Editors

Dr. Maria Rosaria Guarini

Prof. Dr. Eduardo Mosquera-Adell

About the Journal

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

Editor-in-Chief

Prof. Dr. Christine Fürst

Institute for Geosciences and Geography, Department Sustainable Landscape Development, University of Halle, Von-Seckendorff-Platz 4, 06120 Halle, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
