

Special Issue

Local and Regional Planning for Sustainable Development

Message from the Guest Editor

With the development of urbanization worldwide, sustainability has become a topic of wide concern. While the science and rationality of local and regional planning are closely related to the planning actors and processes, there are new approaches, strategies and methodologies that might foster this global endeavor. Formulating and implementing collective actions for local and regional development is an increasingly clearer objective for which pertinence and specific implementation need to be investigated and assessed. The goal of this Special Issue is to collect papers to provide insights into the local and regional planning for sustainable development.

- Principles and insights into local and regional planning;
- Territorial sustainable design;
- Local identity branding;
- Territorial planning methods and ideas;
- Regional development;
- Territorial identity and uniqueness;
- Local landscape architecture;
- Stakeholder involvement in local planning;
- Worldwide local and regional planning schemes or successful case studies.

About the Journal

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

Editor-in-Chief

Prof. Dr. Christine Fürst

Institute for Geosciences and Geography, Department Sustainable Landscape Development, University of Halle, Von-Seckendorff-Platz 4, 06120 Halle, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
