

Special Issue

Soil Erosion and Its Response to Agroforestry Restoration

Message from the Guest Editors

Soil erosion is a complex problem that requires joint measures from governments, institutions, communities, and individuals to prevent and control soil erosion in a sustainable way. The goal of this Special Issue is to collect papers (original research articles and review papers) that give insight into the processes and mechanisms of soil erosion, methods of prevention, the effect of different agricultural and forestry restoration practices on soil erosion, and so on. This Special Issue welcomes manuscripts that link to the following themes:

- The processes and mechanisms of soil erosion in agroforestry areas;
- Sustainable solutions and ways of preventing soil erosion;
- The effect of different agricultural restoration practices on soil erosion;
- The effect of different forestry restoration practices on soil erosion;
- The effect of different land use types on soil erosion.

We look forward to receiving your original research articles and reviews.

About the Journal

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

Editor-in-Chief

Prof. Dr. Christine Fürst

Institute for Geosciences and Geography, Department Sustainable Landscape Development, University of Halle, Von-Seckendorff-Platz 4, 06120 Halle, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
