

Special Issue

Linking Ecological Networks and Ecosystem Service Flow: Toward Regional Ecological Conservation and Sustainability

Message from the Guest Editors

In the context of accelerating global climate change, habitat fragmentation, and biodiversity loss, the integration of spatial ecological structure and ecological functions has become a critical direction in land system science. In terms of contributions to this Special Issue, we are interested in submissions that link ecosystem service flow to ecological networks, ecological security patterns, and ecological restoration. We welcome both empirical studies and conceptual or theoretical explorations that investigate the spatial processes, functional linkages, and planning implications involved in such integration including, but not limited to, the following topics:

- Ecological network theories and methods;
- Ecosystem service flow;
- Ecological restoration effects on ecological networks;
- Ecological security patterns;
- Landscape ecology principles;
- Climate change effects on ecosystem services;
- Landscape connectivity;
- Land use change on ecosystem services;
- Ecosystem service supply and demand;
- Ecosystem services and human well-being;
- Habitat modelling and conservation;
- Regional sustainability.

About the Journal

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

Editor-in-Chief

Prof. Dr. Christine Fürst

Institute for Geosciences and Geography, Department Sustainable Landscape Development, University of Halle, Von-Seckendorff-Platz 4, 06120 Halle, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
