

Special Issue

Monitoring Brazilian Natural and Human-Modified Landscapes

Message from the Guest Editors

In this context, remote sensing and geo-information are indispensable tools for monitoring Brazilian natural and human-modified environments at different spatial and temporal scales. Thus, this Special Issue seeks original and innovative contributions that involve the use of remote sensing and geo-information on the monitoring of Brazilian natural and human-modified landscapes, providing information to directly or indirectly subsidize decision-makers and encourage debate among all social actors in Brazil and abroad. We invite you to submit articles on topics including, but not limited to the following:

- Transdisciplinary studies on the vegetation dynamics, climate, water, society, and its relationships;
- Transdisciplinary studies on forest fires;
- Transdisciplinary studies on climate changes;
- Studies on coastal environments;
- Studies on urban environments;
- Studies on transition environments (ecotones);
- Studies on to improve land-use sustainability.

Guest Editors

Dr. Denilson da Silva Bezerra
Dr. André Luis Silva dos Santos
Dr. Fabricio Brito Silva
Dr. Karla Donato Fook
Dr. Silvana Amaral
Dr. Celso H. L. Silva-Junior
et al.

About the Journal

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant Impact Factor, and has a goal to become the best journal in land in the coming years.

Editor-in-Chief

Prof. Dr. Christine Fürst
Department Sustainable Landscape Development, Institute for
Geosciences and Geography, University of Halle, Halle, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), GEOBASE, PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
