

Special Issue

Rural Demographic Changes and Land Use Response

Message from the Guest Editors

The aim of this Special Issue is to advance our understanding of how rural demographic changes drive shifts in land use patterns and to explore the multidimensional impacts of these changes. Contributions to this Special Issue will examine various aspects such as the socioeconomic implications of altered land use, policy responses and governance frameworks, and technological innovations that influence land management practices. Researchers and practitioners are invited to contribute original research articles, case studies, and reviews that employ diverse methodologies and theoretical approaches. The overarching goal is to provide insights that can inform sustainable land use planning and management strategies in rural areas amidst ongoing demographic transitions. This Special Issue seeks to foster interdisciplinary dialogue and offer practical recommendations for policymakers, land managers, and communities navigating the complexities of rural demographic changes and their land use implications.

Guest Editors

Dr. Yuheng Li

Prof. Dr. Guoming Du

Prof. Dr. Monika Stanny

Dr. Łukasz Komorowski

Deadline for manuscript submissions

30 November 2025

About the Journal

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

Editor-in-Chief

Prof. Dr. Christine Fürst

Institute for Geosciences and Geography, Department Sustainable Landscape Development, University of Halle, Von-Seckendorff-Platz 4, 06120 Halle, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
