

## Special Issue

# Landscape Design, Evaluation and Management Created by Novel Technologies

### Message from the Guest Editors

Landscape architecture has undergone continuous expansion beyond the confines of the 19th-century arts–science binary narrative. The interdisciplinary integration of technology in landscape design, evaluation, and management is pivotal in redefining the boundaries of this discipline. Therefore, it is crucial to explore diverse technologies, propose novel inquiry methods, and develop innovative design strategies to support the growth and advancement of landscape architecture. This Special Issue welcomes articles that explore research outcomes that could be applied to the practice of landscape architecture. Reviews and perspective articles that discuss the development and importance of identifying technologies for landscape architecture, especially as regards the design, evaluation, management and other related topics, are also welcome.

## About the Journal

### Message from the Editor-in-Chief

*Land* is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.
