

Special Issue

2nd Edition: Land Use Change and Its Environmental Effects

Message from the Guest Editors

Land use change has always been a research frontier and an important topic. Scientists have conducted continuous and in-depth research on the depth and breadth of global and regional land use changes. However, with the outbreak of the global COVID-19 pandemic, changes in the international trade situation, and adjustments in national/regional policies, new changes will inevitably occur in the global and regional land use patterns. Quickly and accurately obtaining global or regional land use change information and quantitatively assessing the environmental effects of land use changes can provide a key scientific basis for coping with global changes and for the realization of the United Nations Sustainable Development Goals, as well as providing a scientific reference for the resolution of regional human–land conflicts and related policy formulation.

Papers addressing the topic of global or regional land use change and its environmental effects are invited for this Special Issue, especially those combining a high academic standard coupled with a practical focus on providing optimal solutions for global or regional environmental issues.

About the Journal

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

Editor-in-Chief

Prof. Dr. Christine Fürst

Institute for Geosciences and Geography, Department Sustainable Landscape Development, University of Halle, Von-Seckendorff-Platz 4, 06120 Halle, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
