Special Issue

Integrating Urban Design and Landscape Architecture (Second Edition)

Message from the Guest Editors

Rapid urbanization and related land use changes are key challenges of the 21st century and one of the primary causes of environmental degradation. In this context, new approaches are needed. This can be initiated by integrating urban design with landscape architecture, and architectures and environments through an inter- and trans-disciplinary and trans-scalar approach to planning and design.

This Special Issue welcomes innovation-oriented articles related to the topics listed below.

- integration of urban design, landscape architecture, and architecture
- urban environmental and ecological restoration;
- multifunctional land use;
- integration of green, blue, and grey infrastructure;
- novel urban green systems;
- urban agriculture, horticulture, and gardening;
- urban ecology and multi-species design;
- decision support systems for integrating urban design, landscape architecture, and architecture;
- data-driven design for integrating urban design, landscape architecture, and architecture.

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend Land for your best research publications for a fast dissemination of your research.

Editor-in-Chief
