Dynamic Amazonia: Lessons for a Changing World

Message from the Guest Editors

Amazonia is a dynamic region on the verge of dramatic anthropogenic change. What will happen to its remaining ecosystems and traditional peoples? What will happen to those who came as colonists and worked hard to establish frontier livelihoods? The purpose of this Special Issue is twofold. First, we seek research contributions that discuss Amazonia within a broad context, placing it within a globalized world system. We argue that scholarship from this point forward must make efforts to reflect the region's dynamics and to situate them within global processes and networks. Second, we seek papers that provide insight into the many possible Amazonian futures, which is necessary to better prepare for the changes that are coming.

About the Journal

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

Editor-in-Chief

Prof. Dr. Christine Fürst

Department Sustainable Landscape Development, Institute for
Geosciences and Geography, University of Halle, Halle, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
