

Special Issue

Celebrating 30 Years of International Day against Desertification, and Drought

Message from the Guest Editors

June 17th of each year since 1994 World Day to Combat Desertification and Drought, has been celebrated to raise awareness about the global efforts to combat desertification and encourage the desire to mobilize global efforts to maintain and restore land and soil productivity and mitigate the impact of drought on drylands. The purpose of this Special Issue is to celebrate 30 years of "International Day Against Desertification and Drought". Papers (original research articles and review papers) are encouraged that provide research results on desertification and drought and overviews of global land restoration and drought resilience. Topics of interest for this Special Issue include the following: UN Convention to Combat Desertification (UNCCD); sustainable land management; resilience and adaptation of soil and vegetation to climate change; land and soil restoration; soil-water-vegetation-erosion relations under environmental change; desertification indicators; models of desertification; modelling climate change mitigation and adaptation; socioeconomic approaches to desertification; food & water security; poverty reduction.

About the Journal

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

Editor-in-Chief

Prof. Dr. Christine Fürst

Institute for Geosciences and Geography, Department Sustainable Landscape Development, University of Halle, Von-Seckendorff-Platz 4, 06120 Halle, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
