

## Special Issue

# Evaluating and Managing Historic Landscapes

### Message from the Guest Editors

Historic landscapes are precious cultural assets that reflect the complex interactions between human societies and their environments over time. Preserving and managing these landscapes require interdisciplinary approaches that integrate conservation strategies, sustainable land management, and community engagement. This Special Issue will welcome manuscripts that link the following themes (but you are not limited to these):

- Sustainable management of historic landscapes in the face of climate change and urbanization.
- Heritage conservation policies, legal frameworks, and socio-economic models.
- Evaluation methods and techniques to support sustainable management of historic landscapes.
- The role of digital tools (GIS, remote sensing, and AI) in landscape documentation and monitoring.
- Community engagement and participatory strategies in landscape protection.
- Cultural landscapes and sustainable tourism: challenges and opportunities.

We look forward to receiving your original research articles and reviews.

## About the Journal

### Message from the Editor-in-Chief

*Land* is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.
