

# Special Issue

## Feature Papers for Land–Climate Interactions Section

### Message from the Guest Editor

The Special Issue: “Feature Papers for Land–Climate Interactions Section” welcomes contributions concerning the interactions between land and climate processes. These include energy fluxes, carbon and other biogeochemical cycles, and hydrological processes. The focus of contributions should be on the interface between the land surface and the climate system, and consider the latest insights from global climate science. Contributions can be local, regional, or global in scale. Manuscripts can be theoretical, applied, or review articles. Interdisciplinary manuscripts are particularly welcome.

## About the Journal

### Message from the Editor-in-Chief

*Land* is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant Impact Factor, and has a goal to become the best journal in land in the coming years.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SSCI (Web of Science), GEOBASE, PubAg, AGRIS, GeoRef, RePEc, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
