

Special Issue

Recent Progress in Forest Restoration

Message from the Guest Editors

Forest ecosystems generate important ecosystem services and benefits. However, extensive forest lands have been degraded across the world. The restoration of these lands should be of high priority. Research and innovation in the topic of forest restoration is therefore urgent. This special issue seeks to bring together articles that present recent advances in these and other issues related to the restoration of forest ecosystems. We find the following topics particularly interesting:

- Climate-adaptive forest restoration and reforestation
- Forest restoration and carbon sequestration
- Causes of restoration and reforestation failures vs. success. "Lessons learned" in historic forest restorations
- Effects of forest restoration on biodiversity and genetic diversity
- Species selection in the lights of climate change
- Influence of forest restoration on forest-water-soil relationships. Forest restoration and soil conservation
- Development of innovative seeding and planting techniques
- Forest-related ecosystem services
- Socio-ecological aspects in forestry

About the Journal

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

Editor-in-Chief

Prof. Dr. Christine Fürst

Institute for Geosciences and Geography, Department Sustainable Landscape Development, University of Halle, Von-Seckendorff-Platz 4, 06120 Halle, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
