# Special Issue

# Grassland Ecosystem Services: Research Advances and Future Directions for Sustainability

# Message from the Guest Editors

Grasslands are of paramount importance for the creation of ecosystem services, i.e., supporting, provisioning, regulating and cultural services.

Grasslands sustain economies, from the local to the national levels, human societies and nature by forming numerous habitat types where exceptional elements of biodiversity flourish. Given their importance, a number of scientific works are scanning, searching for and promoting structural and functional elements of grasslands, in disciplines ranging from the political to the economic and ecological ones.

From recent scientific developments to future directions, this Special Issue (SI) aims at presenting the world's grasslands within the framework of sustainable ecosystem management. It seeks to bring to the light the research advances in grassland science and management and, more specifically, the human-made impacts on the creation of ecosystem services related to grasslands:

- grassland abandonment
- grassland ecology
- grassland management
- grassland biodiversity
- grassland hydrology
- issues and threats
- supporting, provisioning, regulating and cultural grassland ecosystem services

## Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend Land for your best research publications for a fast dissemination of your research.

### **Author Benefits**

#### **Open Access:**

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### **High Visibility:**

indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

#### **Journal Rank:**

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
