

Special Issue

Green Exposure, Public Space Usage, and Travel Behavior: Strategies for Building Inclusive Cities and Supporting Vulnerable Groups

Message from the Guest Editors

This Special Issue aims to advance interdisciplinary research on the interactions between green exposure, public space usage, and travel behavior, with particular focus on equity and inclusiveness. We seek contributions that explore how green spaces influence daily mobility patterns, how public spaces can better serve vulnerable groups, and how planning and policy interventions can enhance accessibility, environmental justice, and urban sustainability. We welcome studies employing GIS, spatial modeling, remote sensing, big data analytics, machine learning, behavioral analysis, surveys, experiments, and other interdisciplinary approaches. Areas of interest include, but are not limited to:

- Health benefits of green exposure and urban public space design;
- Travel behavior analysis and improvement strategies for vulnerable groups;
- The interaction between urban green spaces and travel behavior;
- Inclusive urban planning and support policies for vulnerable groups;
- Green exposure and social justice—policy recommendations for enhancing green space accessibility;
- Green exposure, public space usage, and climate adaptation strategies.

About the Journal

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant Impact Factor, and has a goal to become the best journal in land in the coming years.

Editor-in-Chief

Prof. Dr. Christine Fürst
Department Sustainable Landscape Development, Institute for
Geosciences and Geography, University of Halle, Halle, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), GEOBASE, PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
