

Special Issue

Adaptation and Mitigation Strategies for Climate-Resilient Soil–Water Systems

Message from the Guest Editors

Accelerating climate change is heightening the frequency and intensity of hydrological extremes—droughts, floods, and shifts in seasonal water availability—that jeopardize the long-term sustainability of coupled soil–water systems. This Special Issue seeks high-quality research that develops or applies adaptation and mitigation strategies to safeguard these systems and ensure resilient water resources.

Guest Editors

Dr. Nunziarita Palazzolo

About the Journal

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

Editor-in-Chief

Prof. Dr. Christine Fürst

Department Sustainable Landscape Development, Institute for
Geosciences and Geography, University of Halle, Halle, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
