

Special Issue

Reframing Urban Morphology: Heritage, Sustainability, and Contemporary Urban Transformation

Message from the Guest Editors

The overarching goal of this Special Issue is to advance urban morphology as both a theoretical and applied field by examining how urban form is shaped, inherited, transformed, and reinterpreted in response to contemporary urban challenges. It seeks to connect classical morphological scholarship with current concerns related to heritage conservation, sustainability, climate adaptation, socio-spatial change, mobility, public space, and digital transformation. We welcome theoretical, methodological, and empirical contributions, including comparative and case study-based research, that demonstrate how morphological analysis can inform planning, design, regeneration, and heritage-sensitive urban development.

Guest Editors

Dr. Emad Noaime

About the Journal

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant Impact Factor, and has a goal to become the best journal in land in the coming years.

Editor-in-Chief

Prof. Dr. Christine Fürst
Department Sustainable Landscape Development, Institute for
Geosciences and Geography, University of Halle, Halle, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), GEOBASE, PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
