Special Issue

Selected Papers from the 1st International Electronic Conference on Land (IECL2022)

Message from the Guest Editors

This Special Issue will comprise selected papers from the 1st International Electronic Conference on Land (ICEL2022). The event will be held during 17-19 May 2022 on sciforum.net, which is the online platform developed by MDPI for scholarly exchange and collaboration. ICEL2022 is inviting papers and presentations that address the philosophy and key (inter- and transdisciplinary) methodological approaches of land system sciences. Papers selected for publication are those expected to attract the most online interest or that provide a particularly innovative contribution. These papers will be subject to peer review and published with the aim of rapid and wide dissemination of research results, developments, and applications. It is my hope that this conference series will experience rapid growth in the near future, establishing itself as the venue for presenting the most recent and prominent advances in land science.

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend Land for your best research publications for a fast dissemination of your research.
