

Special Issue

Applications of Trajectory Analysis to Describe Changes in a Time Series of Maps

Message from the Guest Editors

We invite authors to contribute to this Special Issue with original research and case studies that apply Trajectory Analysis. The aim of this Special Issue is to provide an overview of the applications of Trajectory Analysis so that we can determine its range of uses and interpretations. We are particularly interested in applications related to land change in Latin America, and especially those that employ [MapBiomass](#) data. Trajectory Analysis has been designed for any non-negative variable, which allows the procedure to analyze variables such as precipitation and biomass. Trajectory Analysis can provide insights into the quality of data, because it is effective in finding suspicious patterns. Therefore, Trajectory Analysis can aid in the early phases of creating a time series, and is particularly effective at cross-site comparisons.

Guest Editors

Prof. Dr. Robert Gilmore Pontius, Jr.

About the Journal

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

Editor-in-Chief

Prof. Dr. Christine Fürst

Institute for Geosciences and Geography, Department Sustainable Landscape Development, University of Halle, Von-Seckendorff-Platz 4, 06120 Halle, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
