

Special Issue

Ecological Restoration and Reusing Brownfield Sites

Message from the Guest Editors

This issue calls for original researches that delve into the spatial characteristics and impacts of ecological restoration and the reuse of brownfield sites and their synergistic evolutionary laws. It promotes a unified perspective on brownfield sites and their surrounding areas as a whole territorial system of human–land relations. Drawing upon the regional system theory of man–land relationships and the social–ecological system theory, this issue aims to enhance our holistic, comprehensive, and systematic understanding of the relationship between ecological restoration and the reuse of brownfield sites. It also seeks to explore the treatment of this land and its surrounding area. Such as:

- The spatial pattern of ecological restoration and the reuse of brownfield sites;
- The co-evolution of ecological restoration and the reuse of brownfield sites;
- Benefits/effects of ecological restoration and the reuse of brownfield sites;
- Case studies of ecological restoration and the reuse of brownfield sites;
- Plans for ecological restoration and the reuse of abandoned regions;
- Policies affecting ecological restoration and the reuse of abandoned regions.

About the Journal

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant Impact Factor, and has a goal to become the best journal in land in the coming years.

Editor-in-Chief

Prof. Dr. Christine Fürst

Geosciences and Geography, University of Halle, Halle, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), GEOBASE, PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
