Urban Planning in a Time of Crisis

Message from the Guest Editors

Urban planning in times of crisis involves developing and implementing solutions that ensure safety, spatial order and efficient functioning of a city or commune in the face of sudden threats, such as natural disasters, economic crises or epidemiological situations. The aim of these activities is not only to minimize losses and quickly restore the efficiency of infrastructure, but also to protect the public interest, ensure spatial order and sustainable development, taking into account social, economic, and environmental needs.

In this Special Issue, we are looking for studies that address contemporary urban design issues. We are interested in research results that address multi-threaded solutions to the crisis in the social, ecological, climate, technological, and security fields.

We look forward to receiving your original research articles and reviews.

About the Journal

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.
