

Special Issue

Multi-Scale Observations of the Impacts of Green Space on Urban Landscapes

Message from the Guest Editors

Urban green space plays a critical role in shaping urban landscape structure, regulating ecological processes, and improving environmental quality in cities; however, the impacts of green space on urban landscapes are not confined to a single spatial or temporal scale.

Instead, the mechanisms and manifestations vary substantially across different spatial and temporal extents. Understanding how green space influences urban landscapes through multi-scale observation and analysis, encompassing ecological processes, physical environmental regulation, and social and cultural responses, has become an important issue on sustainable development and urban landscapes. By integrating perspectives from across multiple scales, this Special Issue seeks to advance theoretical understanding and methodological development in research on urban green space and urban landscapes. At the same time, it aims to provide scientific evidence that can support sustainable urban development and inform landscape planning and governance in rapidly changing urban contexts.

Guest Editors

Prof. Dr. Katsunori Furuya

Landscape Planning Laboratory, Chiba University, Matsudo 271-8510, Japan

Dr. Sining Zhang

Department of Landscape Architecture, School of Architecture, Southwest Jiaotong University, Chengdu 611756, China

Deadline for manuscript submissions

23 October 2026

About the Journal

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant Impact Factor, and has a goal to become the best journal in land in the coming years.

Editor-in-Chief

Prof. Dr. Christine Fürst
Department Sustainable Landscape Development, Institute for
Geosciences and Geography, University of Halle, Halle, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), GEOBASE, PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
