

Special Issue

Landscapes and Sustainable Farming

Message from the Guest Editors

Landscapes and sustainable farming provide a compelling area for research into sustainable development and issues of environmental change and management, policy support and land and environment management. Farming plays a central and fundamental role in attempts to achieve a sustainable future within the limits of Earth resources and forms an important part of Sustainable Development Goal, Zero Hunger. This Special Issue is focussed on diverse perspectives on sustainable farming in landscapes, as a focus of research; as a framework for understanding complexity in sustainable farming and environmental, social and economic consequences; as a contribution to transition to land uses that achieves multiple purposes, and of case studies and examples that plan, design, modify and develop understanding for new land use patterns and farming systems in specific geographic landscapes that can function with the best environmental, economic and social outcomes in mind.

About the Journal

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

Editor-in-Chief

Prof. Dr. Christine Fürst

Institute for Geosciences and Geography, Department Sustainable Landscape Development, University of Halle, Von-Seckendorff-Platz 4, 06120 Halle, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
