

Special Issue

Land Systems and Transformation to Sustainability

Message from the Guest Editor

This Special Issue invites original papers that offer insight into potential transitions to sustainability by exploring land use as an integration of nature-based solutions with the dynamics, function, and resilience of land as coupled socio-ecological systems. We invite papers that address the multidimensional nature of land systems and sustainability issues, and those that consider transformation to land systems and have sustainability as a core goal. The expectation is that the Special Issue will assemble a collection of exemplars that describe and analyze transformative land systems, and examples of conceptual approaches that help with achieving sustainability through land use via changes in land management and policy. This Special Issue will welcome manuscripts that explore the following themes:

- nature-based solutions for land use;
- land use contributions to multiple sustainable development goals;
- innovative and transformative land systems;
- science and policy transformation;
- multi-scale exemplars of multiple-goal systems.

We look forward to receiving your papers.

About the Journal

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

Editor-in-Chief

Prof. Dr. Christine Fürst

Institute for Geosciences and Geography, Department Sustainable Landscape Development, University of Halle, Von-Seckendorff-Platz 4, 06120 Halle, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
